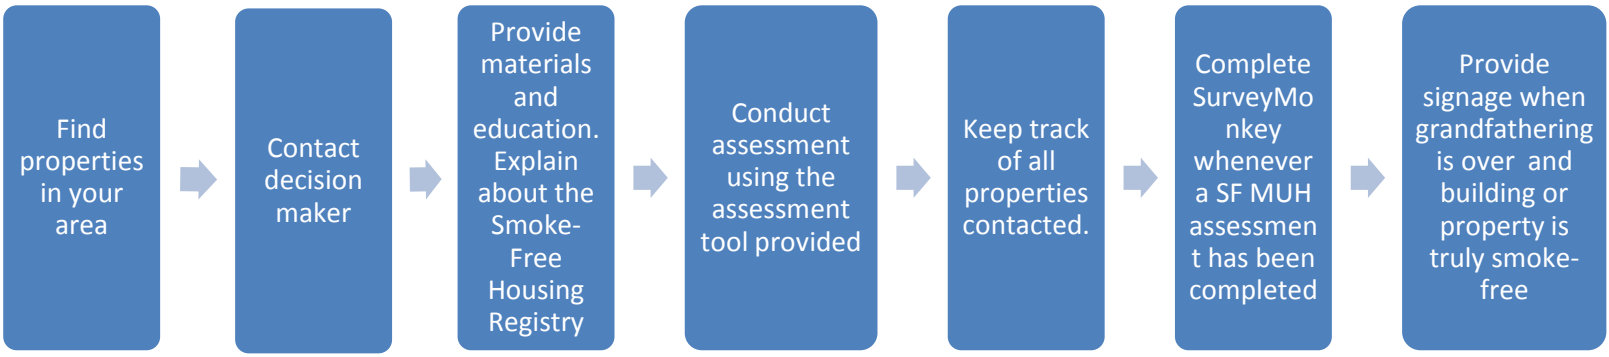
Voluntary, Smoke-Free Multi-Unit-Housing (SFMUH) Quick Reference Sheet

How do I get started?

Depending on the type of grant you have, you can find properties a variety of ways.

If you are a Community Partnership and there is no Community Transformation Grant local contractor in your county, you may target either low-income or market rate properties. For low-income housing you may use the searchable database. For contractors that hold both CTG and CP contracts, CTG programming must be centered on low-income housing and CP activities must focus on market rate housing. CPs that have a separate CTG contractor in the county must focus on only market rate properties .



What is the process for completing smoke-free multi-unit housing objectives?

What materials are available for me to use in making contact with property managers/owners?

At a minimum, available to you are:

1. **Assessment tool:** Available as a printed form in Excel or as a Word document that you can fill in and keep in your files. It is important to keep the information for your records and for quarterly reporting even if they don't implement a voluntary smoke-free policy.
2. **Smoke-Free Signage:** You can download the graphics, take to your printer, and give to property managers once they have enacted a policy. Signage is available at: http://smoke-freehomes.iowa.gov/Managers.aspx
3. **Resources and Guides**: There will be many resources available on the **SmokeFreeHomes.Iowa.gov** website and on the Community Partnership page hosted by the Division for Tobacco Use Prevention and Control**.** These include signage, sample lease addendums, apartment manager's guide, testimonials, and more.
4. **Smoke-Free Multi-Unit Housing Website:** This website will include all resources above as well as the **Smoke-Free Housing Registry,** which will contain all the properties that are 100% smoke-free and information on when they adopt the policy and eliminate grandfathering.

What is the Smoke-Free Housing Registry?

The Smoke-Free Housing Registry will be a searchable registry of smoke-free properties that perspective tenants can search to find rentals. The Community Partnership page will have all your resources for SFMUH activities. The Smoke-Free Homes website will have information for property managers and tenants about the general benefits of smoke-free multi-unit housing. Your response to the survey on survey monkey will create the registry.
