

LIFE  
IS GOOD

And I'm not letting  
anything take me  
away from my family.

# You Don't Have to Have Symptoms to Have Colorectal Cancer

It's the #2 cancer killer in the U.S. for both men and women. Research shows Asians are less likely to be screened, but screening can detect cancer early or even help prevent it.

Several screening tests are available and most insurance companies pay for all or part of the cost.

***Contact your health care provider today to schedule your screening.***
