<b>Grand Total</b>	<b>155</b>

Almost all cases have been identified through testing at the State Hygienic Lab (SHL). Most people's illness began in mid to late June, and at least seven persons have been hospitalized. Many people report still being ill with diarrhea and some have had relapses.

The overall case count has decreased due to several cases not being laboratory-confirmed as having *Cyclospora*. They were confirmed to have *Cryptosporidia* or other artifact present on the slide.

***Case counts are current as of 1:30PM on August 14th, 2013***
