

Thursday, Nov. 29th 8:00 am—12:15 pm

### **Basic Rigging & Scaffolding Safety**

8:00—10:00 am This 2-hour course includes two different sessions. In session one you will learn/review the equipment used and rules to follow when rigging a load, including inspection and storage requirements of equipment. Session two will cover the basic principles in scaffold safety and inspection, including design and wire rope shielding.

Erin Brinkman, Loss Control Consultant with Nationwide, will be the course instructor. Both the instructor and the course have been approved for credit toward lowa OSHA/Safety requirement established by the lowa Plumbing and Mechanical Systems Board. It is worth 2 hours of Safety Training CE credit.

# Fall Protection, Ladder Safety & Preventing Back Injuries

**10:15** am—**12:15** pm This 2-hour course includes three different sessions. Session one deals with both human and equipment related issues for protecting workers from fall hazards. Session two provides training on the proper inspection and setup of ladders. Session three teaches proper lifting techniques to avoid back injury.

SAFETY CE

Erin Brinkman, Loss Control Consultant with Nationwide, will be the course instructor. Both the instructor and the course have been approved for credit toward lowa OSHA/Safety requirement established by the lowa Plumbing and Mechanical Systems Board. It is worth 2 hours of Safety Training CE credit.
