

Web Page Announcement

Are you having your home painted or remodeled? If so, make sure your contractor is a lead-safe renovator. Most of Iowa's pre-1978 homes contain lead-based paint. Unless precautions are taken, painting and renovation projects can put children at risk for lead poisoning. This can affect intelligence, hearing and growth of your child and any child who comes in contact with paint dust or chips. Visit www.idph.state.ia.us/eh/lead_poisoning_prevention.asp or call 800-972-2026.

Hey mom and dad! Excited about having the kitchen remodeled? Make sure your contractor is a lead-safe renovator. Certain projects inside or outside the house can disturb lead-based paint, exposing your children to lead poisoning! Learn more at www.idph.state.ia.us/eh/lead_poisoning_prevention.asp or call 800-972-2026.
