## **Walking with a Purpose Success Story: Eastern Iowa Community College District**

City and county officials, school personnel, and other adults helped complete the walkability assessment in Davenport on May 19, 2010. Organizations represented in the assessment include: Davenport City Council, Park Board, and City Planning and Zoning. The audit revealed that the sidewalks

are currently in poor condition and do not offer enough room for people to walk comfortably. To raise awareness on this issue, the city council will be meeting to discuss the transportation needs of Davenport and to prioritize projects. The community would like a path to be created that connects the Center for Active Seniors, INC (CASI) to the Duck Creek Bike Path to allow people to walk to work, the mall, and the park. CASI will create a petition and seek the support of senior citizens for the project.
