## Walking with a Purpose Success Story: Sioux County

May 17, 2010

The Coalition for a Healthy Sioux County, students, and parents completed a walkability assessment in the town of Hull. The audit was conducted around the schools, library, park, and the pool. The students were very engaged in the process and even created a PowerPoint presentation to deliver their findings to the Hull City Council. For the most part, the sidewalks allowed walkers to get to their destinations. However, there is no sidewalk leading to the park and there are not enough curb cuts around town.
